

SPL S02 squads, as of May 14,2025

SPL Season 02 stats

Broken down phase-wise

Based on Simulation

PowerPlay stats : Team

- ❖ This SPL season too saw some bombastic batting in the PP, with 9 teams going above **150** SR (~54 runs) with the bat on an average. Only CSK failed to produce good starts (138 SR). SRH & RR went above **175**, while making over **1000** runs, hitting **50+** sixes too, AND averaging **70+!!**
- ❖ Very very interestingly, the top 4 teams in terms of SR in PP made the playoffs.
- ❖ 3 teams averaged below 40 (CSK, GT, PBKS), and CSK were the only ones to have 5+ BpB.

PP Batters

Caption ▼ Min. balls = 50.
Min. SR = 160.
McMullen the only one without any dismissals. Maxwell, Duckett, Abhishek, Priyansh stand out.

PowerPlay stats : Team, continued

- ❖ Coming to bowling side, PBKS & MI managed somewhat to keep a lid on things with Eco < 9.2, while GT went at 9.86!
- ❖ LSG, KKR took wickets at SR < 25 in the PP, while RCB (38.8) & RR (47.1) were the bottom two on that regard!

PP Bowlers

- ❖ Talking about wickets, here's one interesting stat::
- ❖ There have been **14** instances of a team losing **3** or more wickets in the PP. They've gone on to lose **85.71%** of the times!
- ❖ So, keep wickets in hand, you can capitalize later. Speaking of which...

Middle-overs stats : Team

- ❖ DC caused some carnage in the middle overs, scoring at **163.43** SR, while CSK were the slowest at **141.14**!
- ❖ 4 teams averaged over **40** - GT, RCB, SRH, CSK. The bottom placed team was KKR, losing wickets for every **28.26** runs.
- ❖ **DC** also have the best Balls-per-Boundary ratio (**5.37**) in this phase (next best by GT with 5.95), CSK being the worst with **7.34**!

Middle-overs Batters

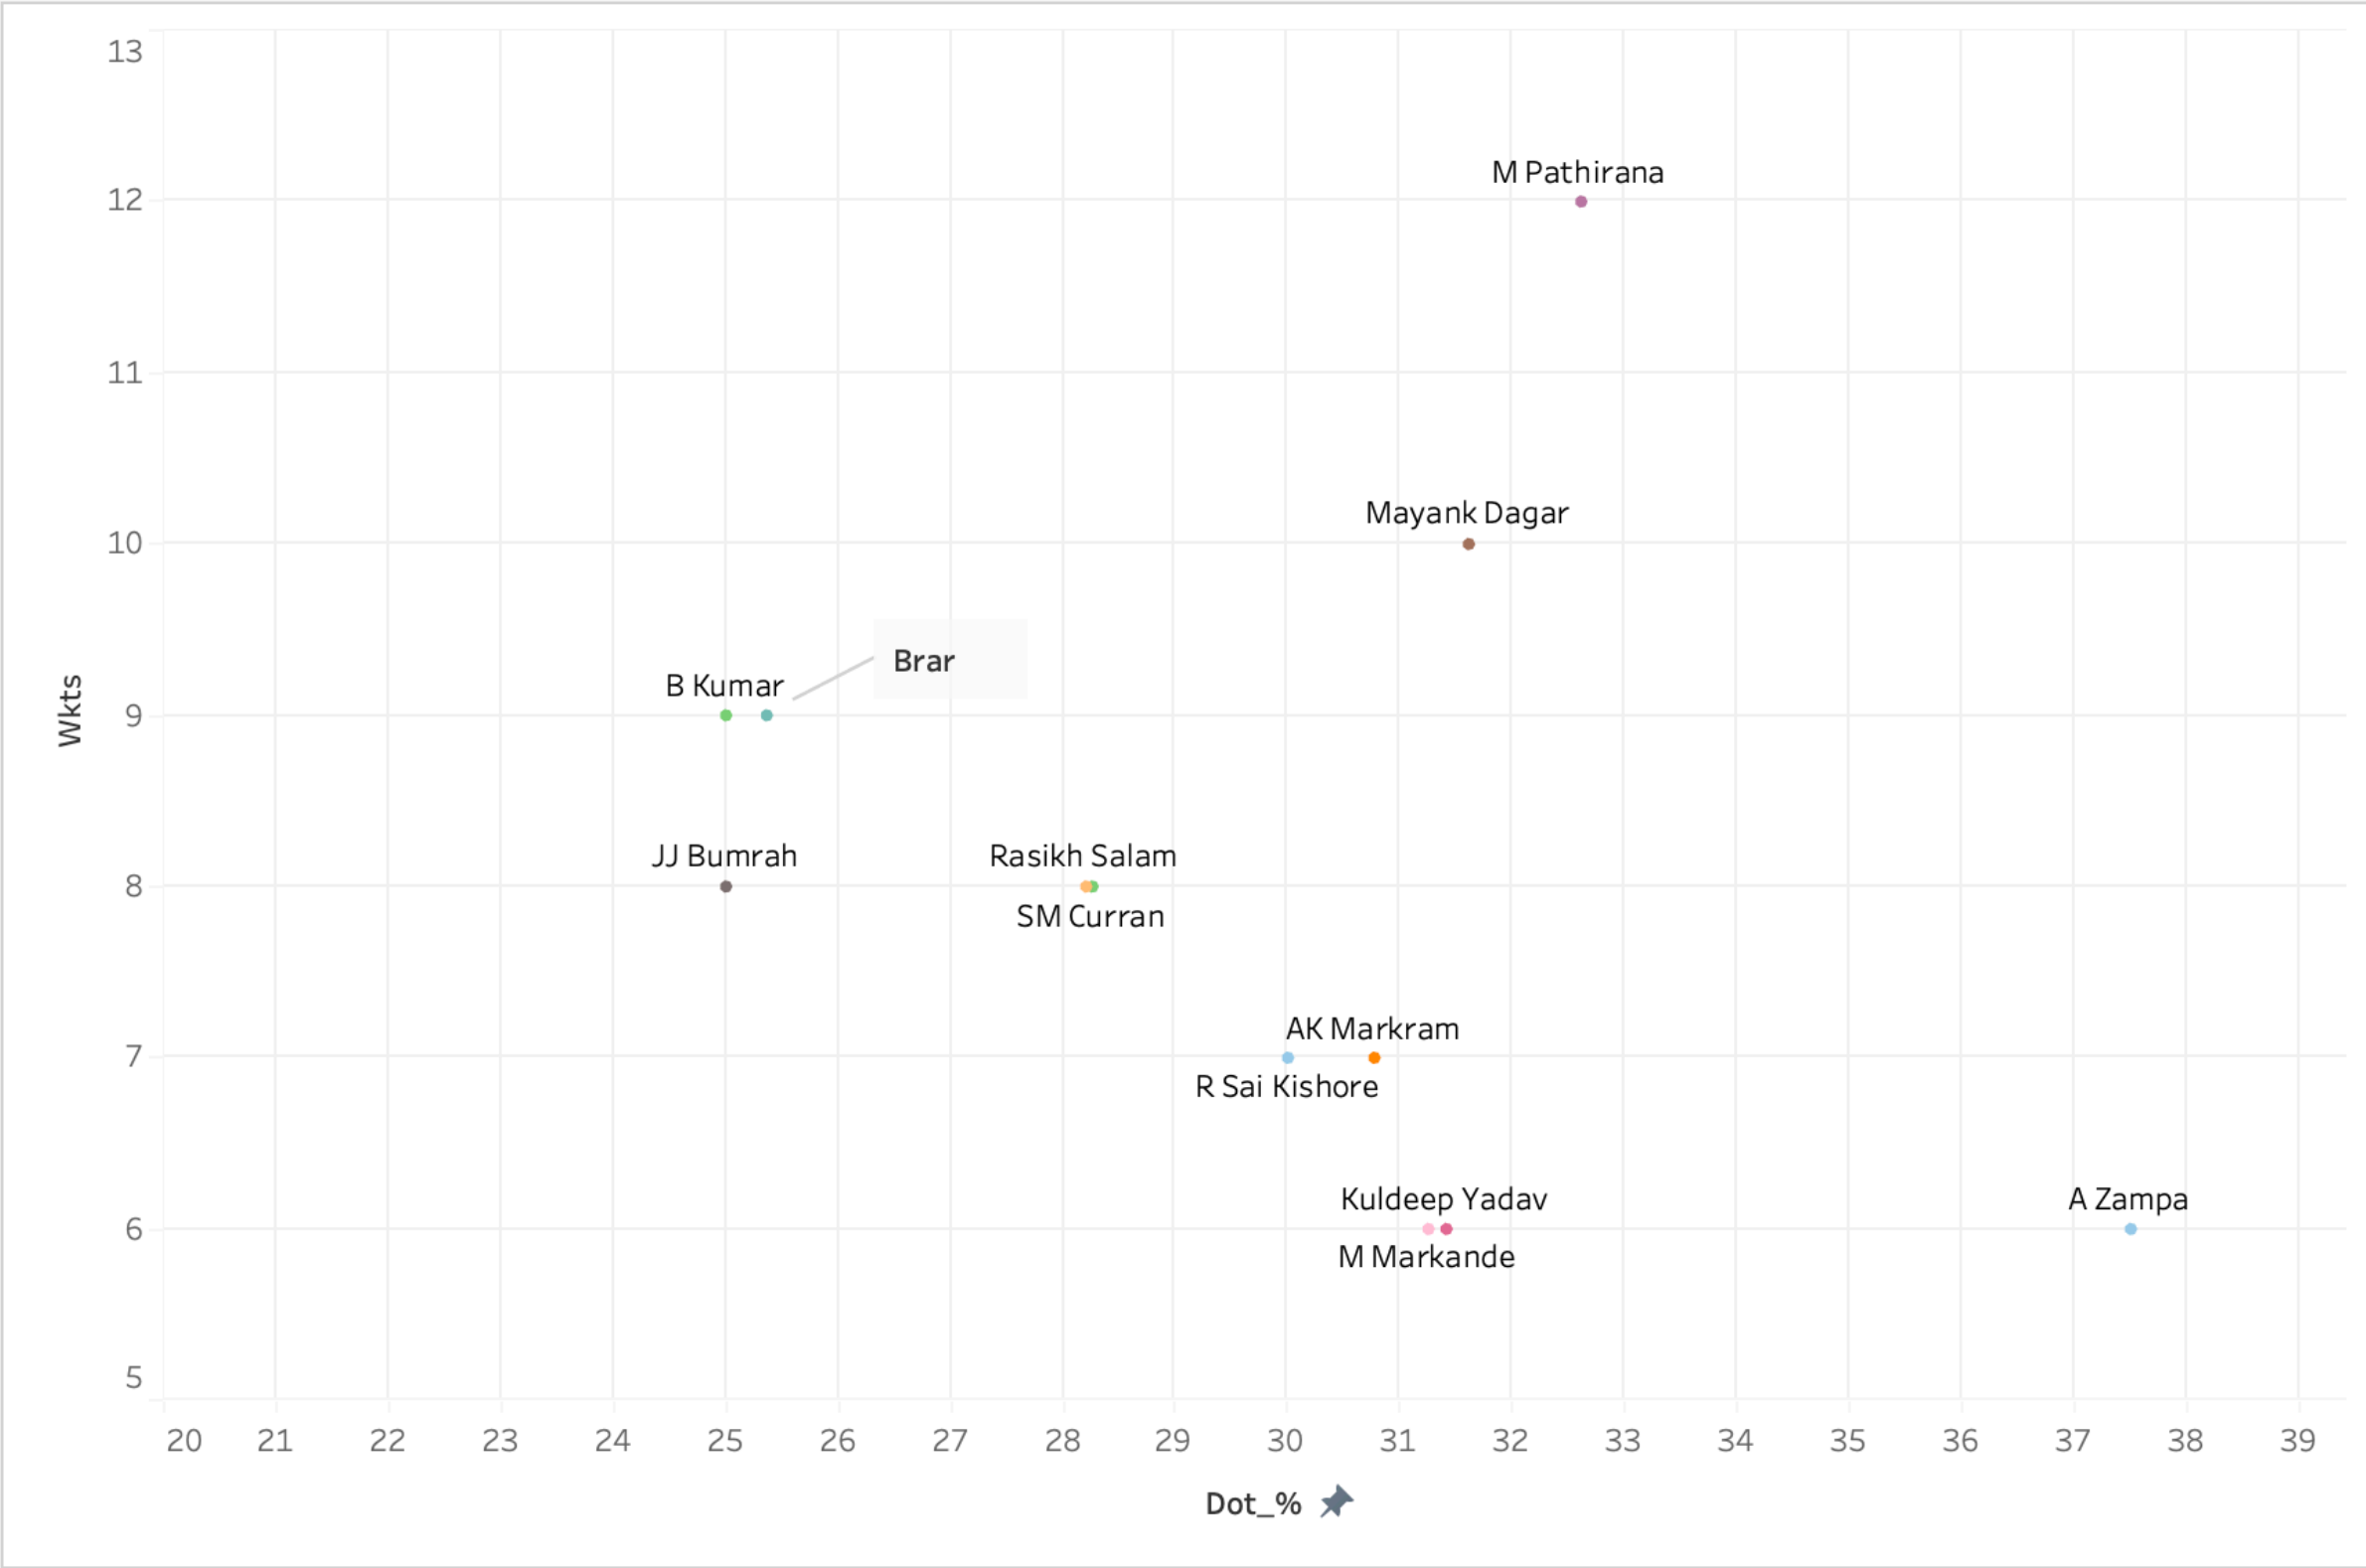

Caption	Min. balls = 75. Min. SR = 140.
---------	------------------------------------

Middle-overs stats : Team, continued

- ❖ With the ball in hand, **PBKS** bowlers were miserly, going at only **8.39** runs-per-over. **SRH** are the poorest here, conceding **9.24** runs per over.
- ❖ **GT & SRH** boss the middle-overs, striking every **21.6 or less** balls, while **DC** found it very hard to do so, with strike-rate of **34.56!**
- ❖ **CSK & PBKS** bowlers were hard to hit boundaries against, with them being the only teams with balls-per-boundary **> 7!**

Middle-Overs Bowlers

Caption ▼

Min. wkts = 6.
Min. balls = 60.
Pathirana stands out for taking wkts, Zampa for producing dots.

- ❖ One more stat, to prove why wickets are gold-dust in this format...
- ❖ There are **24** instances of a team losing **4-or-more** wickets in the middle overs (7-15). They go on to lose **70.83%** of the matches!
- ❖ So once again, don't lose too many in the middle!

Death stats : Team

- ❖ When it comes to finishing, RR, DC, MI did a superb job of maintaining 180+ SR at the death, while PBKS found things very difficult, striking at 151.87!
- ❖ CSK, RR managed to find the boundary every 4 or less balls. GT & PBKS struggle in this aspect, finding boundaries every 5.5+ balls!
- ❖ KKR had the worst batting average in this phase, losing wickets every 14.78 runs, while DC & SRH kept their avg above 30.

Death-overs Batters

Caption	Min. SR = 180. Min. Balls = 40. Max. BpB = 4.
---------	--

Death stats : Team, continued

- ❖ With the ball, CSK absolutely nailed this phase, striking every 11.81 deliveries, while MI found it the most difficult, with the number being 18.18!
- ❖ PBKS were the hardest to hit boundaries against, conceding one every 5 balls, while MI (4) & KKR (4.13) conceded much easily.
- ❖ MI, KKR & DC were costly, going over 11 rpo in this phase.

Death-overs Bowlers

Caption

Min. wkts = 5.
Min. balls = 48.
Archer, Mayank Yadav stand out for taking wkts.

	top row gives per inning average for that wicket									

Comments ::

CSK struggled up top, and bit around the 5th wkt.

GT, LSG, KKR, MI, RR struggle after 4th wkt.

RCB, SRH struggle after the 5th.

PBKS struggled badly for the 5th, and 7th onwards.

DC the only team to bat strong throughout.

Batting stats against Spin-Pace bowling ::
